WHAT'S NEW

Compiled by Karl Fredrickson and Doug Gore

UP ON THIS WHEEL

Longacre has introduced two new, ultra lightweight steering wheels. Both the 15" wheel and its smaller 14" cousin are made from large diameter aluminum tubing. The larger wheel has bumps on its backside for improved grip. Tubing is shot peened to produce a rough surface texture. The aluminum centers are dished. *Longacre Racing Products, 16892 146th St. SE, Monroe, WA 98272, 360-453-2030*

PIT STOP STUD

Kluhsmann's studs have been tested by Anderson Laboratories for safe use in

NASCAR competition. These bullet-nosed studs have their threads rolled after heat treat, a 190,000-psi tensile strength, and a baked-on Dry Film Lubricant. Stud length, KRC part number, and the manufactured lot number are stamped on the end of each. Custom sizes are available. *Kluhsmann Racing Components, 478 W. Dade 142, Lockwood, MO 65682, 800-814-5745*

CLAMPING CLUTCH

RAM's Mike Norcia says their all-steel construction street stock clutch (10.5" diameter) has a solid hub and organic discs. The 24-pound version shown here is also available as a 26- and 30-pound overall weight system. All are rebuildable. *RAM Clutches, 201 Business Park Blvd., Columbia, SC 29203, 803-788-6034*
