

NEW Wheel Studs

(800) 814-5745

"Our Quality Is On The Line"

– The NEW KRC Wheel Studs have been tested by Anderson Laboratories for safe use in NASCAR competition.

– The information you will find on the end of the stud makes it easy to identify the stud part for reorder/reuse.

– This ID has stud length, KRC part number, and manufactured date.

– Wheel studs are produced under strict control standards with ISO 9001 design process.

– 190,000 +PSI alloy steel.

– Threads rolled after heat treatment.

– Baked on Dry Film Lubricant.

– Custom lengths available.

– Super Slick™ 600° coating; out performs 200° grey coating.

– Wide screw flat for stud retention.
